

Cradlepoint MC400 Modular 4G LTE Modem

Dual-Modem Technology for More Bandwidth & Higher Availability

The MC400 Modular LTE Modem combines enterprise reliability with Gigabit-Class LTE performance. Cradlepoint MC400-capable branch, mobile, and IoT routers can be easily upgraded to include industry-leading capabilities such as dual modems and LTE Advanced Pro.

- + Provide more usable bandwidth for burst or peak usage by adding the MC400 modular modem to a Cradlepoint router.
- + Deploy multiple wireless backup connections to help reach 99.99% uptime.
- + Each modem includes two SIM slots for even more data plan diversity options.
- + The Cradlepoint MC400 is supported on most operators in all countries where Cradlepoint routers are sold:
 - + MC400-1200M (North America FirstNet or EU) LTE Advanced Pro
 - + MC400LP6 (North America or EU) LTE Advanced
 - + MC400LP4 (AT&T, Verizon, T-Mobile & Canada) LTE
 - + MC400-600M-C (North America FirstNet) LTE Advanced Pro
 - + MC400LP5 (Asia Pacific or Saudi Arabia) LTE Advanced

COMPATIBLE PRODUCTS

- + AER2200
- + AER1600 Series
- + ARC CBA850
- + COR IBR1700
- + COR IBR900 Series*
- + COR IBR600B/C Series*

BENEFITS

- + **Higher availability:** Insert an MC400 to add a second active LTE link for primary & failover connectivity
- + **Ultimate WAN Diversity™:** Combine 4G LTE with dual-modem, dual-SIM, & multi-carrier functionality; Ethernet; &/or WiFi-as-WAN
- + **Flexibility:** Auto-switch SIM cards when you've reached your data plan cap
- + **Future-proof your network:** Field upgrade existing routers to the latest modem technology
- + **Locate assets:** Active GPS with support for CAD & fleet management, ensures vehicles can always be located

FEATURES

- + Offers second modem capability
- + Dual SIM slots in each modem
- + Active GPS**
- + Support for public safety networks & Band 14
- + Support for Gigabit-Class LTE Advanced Pro
